Non-GAAP and Other Financial Disclosures

Our definitions of the non-GAAP and other financial measures may differ from those used by other companies.

Non-GAAP Financial Disclosures

We present certain measures of our performance that are not calculated in accordance with GAAP. We believe that these non-GAAP financial measures highlight our results of operations and the underlying profitability drivers of our business, as well as enhance the understanding of our performance by the investor community.

The following non-GAAP financial measures, previously referred to as operating measures, should not be viewed as substitutes for the most directly comparable financial measures calculated in accordance with GAAP:

Non-GAAP financial measures:

adjusted earnings
adjusted earnings, less notable items
adjusted revenues
adjusted expenses
adjusted earnings per common share
adjusted earnings per common share, less notable items
adjusted return on equity
adjusted return on equity, less notable items
adjusted net investment income

Most directly comparable GAAP financial measures:

net income (loss) available to shareholders (1)
net income (loss) available to shareholders (1)
revenues
expenses
earnings per common share, diluted (1)
earnings per common share, diluted (1)
return on equity
return on equity
net investment income

(1) Brighthouse uses net income (loss) available to shareholders to refer to net income (loss) available to Brighthouse Financial, Inc.'s common shareholders, and net income (loss) available to shareholders per common share to refer to earnings per common share, diluted.

Reconciliations to the most directly comparable historical GAAP measures are included for those measures which are presented herein. Reconciliations of these non-GAAP financial measures to the most directly comparable GAAP financial measures are not accessible on a forward-looking basis because we believe it is not possible without unreasonable efforts to provide other than a range of net investment gains and losses and net derivative gains and losses, which can fluctuate significantly within or outside the range and from period to period and may have a material impact on net income (loss) available to shareholders.

Adjusted Earnings, Adjusted Revenues and Adjusted Expenses

Adjusted earnings, which may be positive or negative, is used by management to evaluate performance, allocate resources and facilitate comparisons to industry results. This financial measure focuses on our primary businesses principally by excluding (i) the impact of market volatility, which could distort trends, and (ii) businesses that have been or will be sold or exited by us, referred to as divested businesses.

PUBLIC RELATIONS

Adjusted earnings reflects adjusted revenues less adjusted expenses, both net of income tax, and excludes net income (loss) attributable to noncontrolling interests. Provided below are the adjustments to GAAP revenues and GAAP expenses used to calculate adjusted revenues and adjusted expenses, respectively.

The following are significant items excluded from total revenues, net of income tax, in calculating the adjusted revenues component of adjusted earnings:

- Net investment gains (losses);
- Net derivative gains (losses), except earned income on derivatives that are hedges of investments or that are used to replicate certain investments, but do not qualify for hedge accounting treatment ("Investment Hedge Adjustments"); and
- Amortization of unearned revenue related to net investment gains (loss) and net derivative gains (losses) and certain variable annuity GMIB fees ("GMIB Fees")⁽¹⁾.

The following are significant items excluded from total expenses, net of income tax, in calculating the adjusted expenses component of adjusted earnings:

- Amounts associated with benefits and hedging costs related to GMIBs ("GMIB Costs")⁽¹⁾;
- Amounts associated with periodic crediting rate adjustments based on the total return of a contractually referenced pool of assets and market value adjustments associated with surrenders or terminations of contracts ("Market Value Adjustments"); and
- Amortization of DAC and VOBA related to (i) net investment gains (losses), (ii) net derivative gains (losses), (iii) GMIB Fees and GMIB Costs and (iv) Market Value Adjustments⁽¹⁾.

The tax impact of the adjustments mentioned is calculated net of the U.S. statutory tax rate, which could differ from our effective tax rate.

Consistent with GAAP guidance for segment reporting, adjusted earnings is also our GAAP measure of segment performance.

Adjusted Earnings per Common Share and Adjusted Return on Equity

Adjusted earnings per common share and adjusted return on equity are measures used by management to evaluate the execution of our business strategy and align such strategy with our shareholders' interests.

Adjusted earnings per common share is defined as adjusted earnings for the period divided by the weighted average number of fully diluted shares of common stock outstanding for the period.

Adjusted return on equity is defined as total annual adjusted earnings on a four quarter trailing basis, divided by the simple average of the most recent five quarters of total Brighthouse Financial, Inc.'s stockholders' equity, excluding AOCI.

⁽¹⁾ Collectively, amounts related to GMIB, excluding amounts recorded in NDGL, may be referred to as "GMIB adjustments."

Adjusted Net Investment Income

We present adjusted net investment income to measure our performance for management purposes, and we believe it enhances the understanding of our investment portfolio results. Adjusted net investment income represents net investment income including investment hedge adjustments and excluding the incremental net investment income from CSEs.

Other Financial Disclosures

Corporate Expenses

Corporate expenses includes functional department expenses, public company expenses, certain investment expenses, retirement funding and incentive compensation; and excludes establishment costs.

Notable items

Certain of the non-GAAP measures described above may be presented further adjusted to exclude notable items. Notable items reflect the impact on our results of certain unanticipated items and events, as well as certain items and events that were anticipated, such as establishment costs. The presentation of notable items and non-GAAP measures, less notable items is intended to help investors better understand our results and to evaluate and forecast those results.

Book Value per Common Share and Book Value per Common Share, excluding AOCI

Brighthouse uses the term "book value" to refer to "stockholders' equity." Book value per common share is defined as ending Brighthouse Financial, Inc.'s stockholders' equity, including AOCI, divided by ending common shares outstanding. Book value per common share, excluding AOCI, is defined as ending Brighthouse Financial, Inc.'s stockholders' equity, excluding AOCI, divided by ending common shares outstanding.

CTE95

CTE95 is defined as the amount of assets required to satisfy contract holder obligations across market environments in the average of the worst 5 percent of 1,000 capital market scenarios over the life of the contracts.

CTE98

CTE98 is defined as the amount of assets required to satisfy contract holder obligations across market environments in the average of the worst 2 percent of 1,000 capital market scenarios over the life of the contracts.

Holding Company Liquid Assets

Sales

Statistical sales information for Life sales is calculated using the LIMRA definition of sales for core direct sales, excluding company-sponsored internal exchanges, corporate-owned life insurance, bank-owned life insurance, and private placement variable universal life insurance. Annuity sales consist of 100 percent of direct statutory premiums, except for fixed indexed annuity sales distributed through MassMutual that consist of 90 percent of gross sales. Annuity sales exclude company sponsored internal exchanges. These sales statistics do not correspond to revenues under GAAP, but are used as relevant measures of business activity.

Net Investment Income Yield

Similar to adjusted net investment income, we present net investment income yields as a performance measure we believe enhances the understanding of our investment portfolio results. Net investment income yields are calculated on adjusted net investment income as a percent of average quarterly asset carrying values. Asset carrying values exclude unrealized gains (losses), collateral received in connection with our securities lending program, freestanding derivative assets, collateral received from derivative counterparties and the effects of consolidating under GAAP certain VIEs that are treated as CSEs.

Adjusted Statutory Earnings

Adjusted statutory earnings is a measure of our ability to pay future distributions and are reflective of whether our hedging program functions as intended. Adjusted statutory earnings is calculated as statutory pre-tax income less the variable annuities reserve methodology (Actuarial Guideline 43) and including both the reserve and capital methodology based CTE95 calculation and unrealized gains (losses) associated with the variable annuities risk management strategy.
